English - B2

PROFILE

My name is Albot Ciprian and I am a first-year student at the University of Moldova, majoring in Applied Informatics. I hold a degree from my previous academic endeavors at CEITI (center of excellence in informatics and information studies). In addition to my academic pursuits, I have gained valuable professional experience during my tenure as Data Analytics Manager at Unifun International from March 20, 2023 to date.

In my role at Unifun International, I started as a junior data analyst and quickly progressed to the position of middle data analyst as team leader of the Reporting and Analytics department.

My area of responsibility was:

1. Administration of work in the department, checking and analyzing the quality of task performance:

2. Administration of the central analysis server, which processes data for all statistical information of the company, implementation of optimization methods of the server, namely of all the services on it and the database.

3.I was responsible for creating new logical strategies for data aggregation and data synchronization using SymmetricDS.

4. I was also responsible for the development of data aggregation scripts, mostly using Python.

5. Maintenance and configuration of the new SymmetricDS synchronizations.

6.I played a key role in creating Tableau reports and managing the on-premises Tableau server to ensure seamless performance of the company's service statistics.

7.Setting up data synchronization between MySQL databases and company servers was another critical aspect of my role.

8. I was assigned a USSDGW Health Check Java project, to which I was part as the main developer, in which we developed java, bash script and the database for the project.

These responsibilities highlight a portion of my significant contributions to the company's success. I am confident that my skills in data analysis, programming, and problem-solving, combined with my dedication to continuous learning, make me a valuable asset to any organization. My experience at Unifun International strengthened my skills in data analysis, database management and project collaboration, both in the management of a department.

In conclusion, I am a dedicated and talented professional with a solid foundation in IT backed by hands-on experience and passion for the field. I am eager to bring my expertise to new challenges and projects that require innovative solutions. My good communication skills, attention to detail and commitment to personal and professional growth make me the ideal candidate for your organization.
